

Triton TRIBOR 10

INORGANIC BORON WOOD PRESERVATIVE

A ready to use Dual Purpose formulation for use as a wood preservative against wood rotting fungi and insect attack. Boron compounds are well established as preservatives having excellent activity against wood destroying fungi and insects. When formulated as TRIBOR products, the following advantages, compared to existing preservatives are obtained:

- DEEP penetration into timber, wet or dry.
- BROAD spectrum of fungicidal and insecticidal activity
- VERY low mammalian toxicity
- PRACTICALLY odourless
- NON-FLAMMABLE
- LOW VOLATILITY for long-term efficacy and environmental safety.

Description

Triton TRIBOR 10 is a 10% w/w solution of disodium octaborate tetrahydrate and 2% (ai) Benzalkonium chloride dissolved in water and mono-ethylene glycol. **Triton TRIBOR 10** is suitable for use as a wood preservative. When used in conjunction with **Triton TRIBOR 20** and **Triton TRIBOR GEL**, a complete Dry Rot treatment, eradicated and preventative can be achieved.

Triton TRIBOR 10 is supplied ready for use, no further dilution is necessary or advised.

Application

The source of moisture triggering a dry rot outbreak should be identified and rectified as permanently as possible. Rapid drying of timber should be promoted and maintained. Thoroughly prepare all surfaces, which are to receive treatment.

When treating timber ensure that surfaces to be sprayed are clean and absorbent. As usual when applying preservatives, isolate electrical junctions and sockets and cover water storage tanks. In some circumstances it may be necessary to apply 2 coats to achieve the desired application rate. Avoid treating sealed, stained or varnished/painted surfaces, the **Triton TRIBOR 10** will not be absorbed.

Coverage Information

- By Brush 1 litre to 6-8 square metres
- By Coarse spray 1 litre to 4-5 square metres

General Information

CLEAN UP	Use tap water
SHELF LIFE	12 months in cool, dry conditions
PACKAGING	5 litre and 25 litre containers

Related Products

TRIBOR GEL	Applied into joist and beam-ends when timbers are damp and at risk from decay.
TRIBOR 20	Applied to timbers to give insecticidal and fungicidal protection applied by brush or microspray.
MICROSPRAY	Novel application technique for Tribor 20, allows treatment of inaccessible voids, sub-floor areas, etc.

Precautions

See separate Health and Safety data.
